This should work for me. I would like to put the lab visit at the end of our time slot. I will check with Robbins and Scott to confirm.

Jim,

I don't know when on Tuesday but NSW will have a time slot (30-45min?) to cover the following:

Non-Responsive

Bristol Bay: Seems to be a sensitive topic so not sure yet if it can be discussed. Tom is checking on this.

Non-Responsive

Tony

Tony,

I know you are aware of this, but out **Non-Responsive** Bristol Bay assessment are very high visibility items for the Office of Water. It would seem to have them receive some attention (at least briefly) during the congressional staffer briefing.
